

Content

1. Introduction

- 1.1. Purpose of the assessment
- 1.2. Analysis approach

2. Development and support process, team composition

- 2.1. Development processes for change requests and bug fixes
- 2.2. Team composition and roles
- 2.3. Issues and gaps
- 2.4. Recommendations

3. Quality Assurance

- 3.1. QA process, tests coverage, tests management, automation
- 3.2. Issues and gaps
- 3.3. Recommendations

4. Product maintenance and release management

- 4.1. Release process and ownership, automation
- 4.2. Issues and gaps
- 4.3. Recommendations

5. Solution architecture and architecture management

- 5.1. Architecture ownership, key roles and dependencies
- 5.2. Technical architecture overview
- 5.3. Systems and components, dependencies
- 5.4. Performance
- 5.5. Infrastructure
- 5.6. Issues and gaps
- 5.7. Recommendations

6. Assessments results overview

- 6.1. Most critical gaps and issues
- 6.2. Quick wins
- 6.3. Middle- and long-term suggestions for the roadmap

7. Appendix

- 7.1. Documents provided with this report
